Welcome to Another World!

Gixxer SF Wind Tunnel Test

The GIXXER SF not only looks sharp & edgy, it has been developed in the same wind-tunnel where the Legendary Hayabusa, GSX-R and MotoGP machine are developed! The fairing has been designed to give maximum wind protection to the rider reducing turbulence and drag thereby achieving great Aerodynamic efficiency. This directly results in higher down force for stable braking and lower drag for better handling in high speed range.
